DETAILED ACTION

2. This communication is responsive to the application filed 03/02/2004.

Claim Rejections - 35 USC § 112, 2nd Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it recites the limitation of "the converter" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Hirano (U. S. Pat. - 4,720,868).

Art Unit: 2643

Regarding claim 1, Hirano discloses a speaker apparatus comprising: a speaker unit including a main converter (10) for converting an electrical signal into mechanical vibration, a vibration plate (109) for emitting sound waves to the front side of the main converter, and a frame (107) fixed to the main converter, for vibratably supporting the vibration plate from a rear side thereof; a compensation converter (20) fixed to a rear side of the main converter, for converting an electrical signal to mechanical vibration, the compensation converter being smaller and lighter than the main converter; and a compensation mass body (203, 204, 206) lighter than the vibration plate, for serving as a load of mechanical vibration of the compensation converter as claimed.
